

Magnifique!

Explore the world of packaging possibilities

It's another French revolution. While Europeans have traditionally favored plastic packaging for ice cream, Nestle-France has now adopted preprinted non-round paperboard. An important reason is sustainability—paperboard is the environmental choice. Formed on the PMC-1300 machine, Nestle-France ice cream tubs both preserve taste and the environment. How French, oui?

Where in the world will your ideas take you? For the full story on international packaging, please go to papermc.com/globalgallery.
