### BOTTOM FINISH ASSEMBLY

No. 221.1

#### THREAD LOCKING COMPOUND 1000, 1001, 1002, 1250

Field reports have indicated that the screw securing the washer to the roller shaft of the spac tooling is coming loose. This will damage the mandrel stems. We recommend that removable thread locking compound (blue #242) be applied to the screw to prevent it from coming loose.
