PAPER MACHINERY CORPORATION WILL EXHIBIT AT FACHPACK IN NUREMBERG, GERMANY

MILWAUKEE, WI – June 19, 2019 – Paper Machinery Corporation (PMC) will exhibit at FachPack, September 24 – 26, at the Exhibition Centre Nuremberg, hall 4, booth 4-361.

PMC's booth will feature samples of unique round and non-round packages and hot and cold drink cups from a wide variety of international brands. These packages and cups are formed on PMC's advanced line of container forming and overwrapping machines.

Paper Machinery Corporation leads the industry with innovative, custom engineered, cup and container forming machines. PMC produces efficient, state-of-the-art machinery including their PMC 2000S and PMC 2500S servo drive models and high speed PMC 1003 cup forming machine. "Our servo drive forming machines allow tool changeovers in less than a single shift, which is ideal for a flexible production environment." stated Mike Hansen, PMC's Vice President of Packaging.

PMC's overwrapping machines are widely used in packaging and hot drink applications. PMC offers double wall, triple wall and specialty wrapping machines with customer specified configurations.

About Paper Machinery Corporation

Paper Machinery Corporation is the world's leading source of forming machines for paperboard cups, containers, and custom packages. PMC manufactures dependable, high quality forming machines for converters and end users and has more than 2,500 installations worldwide. PMC's corporate headquarters and manufacturing facility is located in Milwaukee, Wisconsin, U.S.A. This facility houses engineering, service, machining centers, as well as machine assembly. PMC is an employee owned company. For more information, visit www.papermc.com or call Donna Lehto at 414-362-8231.
