

PMC 2500S

Cup & Container Forming Machine

The PMC 2500S forming machine combines speed, versatility, and reliable performance with an entirely servo-driven platform for greater production flexibility.

The PMC 2500S efficiently forms inline, and creates pre-formed nestable containers for converters and co-packers. The servo design allows fast tooling change-overs for cups and containers in round or non-round and tapered or straight wall configurations.

Produces tapered cups and containers at speeds up to 170 CPM.

Forms paper or plastic containers ranging from 4 oz. to 46 oz. depending upon configuration.
